Profile

Results-driven Full Stack Developer with hands-on experience in developing scalable web applications and Forex Trading Platforms using React.js, Node.js, MongoDB, and MySQL. Skilled in REST API development, real-time systems using Socket.io, Cron Job automation, authentication, compliance monitoring, and backend optimization. Passionate about building secure, responsive, and high-performance applications with strong problem-solving abilities.

Education

Prof.Ramkrishna More Arts, Commerce & Science College, Akurdi, Pune

MSc (Computer Science)

2022-2024

Pune, Maharashtra

Pratibha College of Commerce and Computer Studies, Chinchwad, pune

BSc (Computer Science)

2019-2022

Pune, Maharashtra

Technical Skills

- JavaScript	- React.js	- Express.js	- Tailwind CSS	- Node.js
- MongoDB	- MySQL	- Socket.io	- Next.js	- Redis
- GitHub	- REST APIs	- Postman		

Experience

MERN Stack Developer

Heddge Capital Private Limited, Pune | Forex Trading Platform | March 2026 -Present

- Developed a secure Forex trading platform with Admin and User modules.
- Implemented real-time notifications for deposits, withdrawals, and KYC updates using Socket.io. Built Cron Job systems for compliance monitoring and fraud detection.
- Developed announcement priority system using Red, Yellow, and Green status indicators for critical, warning, and general updates.
- Developed risk monitoring and suspicious login tracking systems.
- Integrated email automation and audit logging features.
- Developed secure REST APIs and backend services for trading, wallet, KYC, and notification management.
- Created responsive trading dashboard and wallet management system.
- Developed and maintained multiple backend automation Cron Jobs for compliance and risk monitoring systems.

MERN Developer

Pawar Infotech, Pune / June 2024 – Feb 2025

- Developed scalable **RESTful APIs using Node.js and Express.js**, enabling smooth data handling and communication between frontend and backend systems.
- Designed and optimized **MySQL** database schemas for efficient data storage and retrieval.
- Built dynamic and responsive user interfaces using **React.js and Tailwind CSS**, ensuring a seamless user experience across devices.
- Improved website performance by optimizing front-end code written in React and Tailwind CSS.
- Assisted in deploying full-stack applications to platforms like Netlify and Render.

Personal Projects

Personal Portfolio / *Tailwind CSS, React Js*

 Live link - [new-portfolio](#)

VideoConnect — Real-Time Video Conferencing Platform / *React.js, Node.js, Express.js, Socket.IO, WebRTC, MySQL, Tailwind CSS*

- Developed a full-stack video conferencing platform inspired by Google Meet with secure JWT-based user authentication.
- Implemented real-time peer-to-peer video/audio calling and screen sharing using WebRTC and Socket.IO.
- Built features including meeting creation, join via meeting link, live chat, participant management, raise hand, and host-controlled meeting termination.
- Integrated responsive UI using Tailwind CSS, ensuring seamless experience across desktop, tablet, and mobile devices.
- Deployed the application using **Netlify** (Frontend), **Render** (Backend), and **TiDB Cloud Serverless** (MySQL database).

Turf Finder / *ReactJs, TailwindCSS, NodeJs, and MYSQL*

A platform for booking sports turfs with secure authentication, online payments, and an admin dashboard for turf management.

◆ **Tech Stack:** React.js, Tailwind CSS, Node.js, SQL, Razorpay

◆ **Features:**

- ✓ Admin: Manage turfs (CRUD), view/filter bookings
- ✓ User: Search turfs, book slots, make payments, download PDF pass
- ✓ Secure login, password reset via email

 **Live Demo:** [turf-finder-project.netlify.app](#)

Airline Reservation System/ *ReactJs, TailwindCSS, NodeJs, and MYSQL*

- Project developed by using TailwindCSS, ReactJs, NodeJs, and SQL.
- It contains two sides, the Admin and User side.
- Admin can schedule, update the flights and can see the ticket booking details.
- User can book the tickets of flight according to their time and city and pay the payment using Payment Gateway Integration (Razorpay) and after the successful payment, ticket PDF will download.
